

HIRUNI IRESHA

Computer Engineering Undergraduate | Full-Stack Developer

hiruireshasewwandi@gmail.com | 077-9967659 | No: 945, 2nd Mile Post, Panamura Road, Embilipitiya

LinkedIn | GitHub

SUMMARY

Third year Computer Engineering undergraduate passionate about software engineering and full-stack development. Experienced in building web applications with React, Spring Boot, and MongoDB, and familiar with Git, Docker, and CI/CD workflows. Seeking a software engineering internship to apply skills, learn new technologies, and contribute to real-world projects.

EDUCATION

University of Ruhuna, Faculty of Engineering

B.Sc. Eng. (Hons.) in Computer Engineering

Hapugala, Galle

May 2023 – Present

R/Emb/President College

G.C.E. Advanced Level Examination: 2 A's, 1 B

Embilipitiya

Jan 2011 – Aug 2020

PROJECTS

Centralized Doctor & Channeling Management System

Software Group Project (Ongoing)

React, Spring Boot, MongoDB Atlas, Tailwind CSS, JWT, Cloudinary

- Centralized healthcare web connecting patients, doctors, and hospitals.
- Role-based authentication and user management using JWT.
- Modules for doctor search, profile, appointment booking, cancellation, rescheduling.
- Secure medical report uploads via Cloudinary.
- Scalable backend APIs integrated with responsive React frontend.

Construction Management System - GitHub

Individual Project

MongoDB, Express.js, React, Node.js, Tailwind CSS

- Full-stack construction management system connecting clients and companies.
- Role-based authentication for Admin, Client, Company, Engineer.
- Client search, project requests, company profile views.
- Project activity management and progress monitoring.
- Responsive UI with Tailwind CSS and MongoDB backend.

DevOps Implementation for Construction Management System - GitHub

Individual Project

GitHub, Jenkins, Docker, AWS EC2, Terraform

- Automated build/deploy using Jenkins & GitHub webhooks.
- Provisioned AWS EC2 via Terraform (IaC).
- Deployed Dockerized application on AWS EC2 with environment configs.

Expense Tracker Mobile Application - GitHub

Team Project (2 members)

Flutter, Dart, Firebase, Firestore

- Track daily income and expenses with user friendly interface.
- Secure login/signup authentication.
- Add/edit/delete income and expense records.
- Visual statistics and summaries.
- Real-time data updates using Firebase/Firestore.

React, Vite, React Router, CSS, Node.js, Express, MySQL, Axios, Cloudinary

- Full-stack movie rating & review platform with responsive UI.
- Browse movies by category, view descriptions, add reviews.
- Admin panel for CRUD operations on movies.
- Backend APIs integrated with React, images stored securely on Cloudinary.
- Focused on clean UI and smooth UX.

SKILLS

Programming Languages:	C++, Python, Java, Dart, JavaScript, TypeScript
Web Development:	HTML, CSS, Tailwind CSS, React, Node.js, Express
Databases:	MySQL, MongoDB, Firebase
Mobile App Dev:	Flutter
Version Control:	Git, GitHub
IDEs:	Visual Studio, VS Code, Android Studio, IntelliJ
Backend & APIs:	RESTful APIs
DevOps & Deployment:	Docker, Jenkins, Terraform, AWS
Project Management:	Jira
Design / Prototyping:	Figma

ACHIEVEMENTS & ACTIVITIES

- HaXtreme 4.0 (2025) - Finalists, IEEE Student Branch, University of Ruhuna
- Committee Member - Gaweshakayo Club, Faculty of Engineering, University of Ruhuna
- Technical Team Committee Member - XBOTIX 2025 Robotix Competition
